CUnit - A Unit testing framework for C.

http://cunit.sourceforge.net/

Automated Test Run Results

Running Suite TC01 - Initialize a PCAN Channel

CUI - Initialize a PCAN Channel	
Running test TC01.1 - Initialize PCAN-USB interface with default parameters	
Running test TC01.2 - Initialize PCAN-USB interface a second time	Passed
Running test TC01.3 - Initialize PCAN-USB interface a second time after uninitializing	Passed
Running test #TC01.4 - Initialize PCAN-USB interface when interface is not present	Passed
Running test #TC01.5 - Initialize PCAN-USB interface when interface is used by another process	Passed
Running test TC01.6 - Initialize PCAN-USB interface with parameter 'Channel == PCAN_NONEBUS'	
Running test TC01.7 - Initialize PCAN-USB interface with parameter 'Channel == PCAN_USBBUS1 - 1'	
Running test TC01.8 - Initialize PCAN-USB interface with parameter 'Channel == PCAN_USBBUS8 + 1'	Passed
Running test TC01.9 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN_BAUD_1M'	Passed
Running test TC01.10 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN_BAUD_500K'	Passed
Running test TC01.11 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN_BAUD_250K'	Passed
Running test TC01.12 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN_BAUD_125K'	Passed
Running test TC01.13 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN_BAUD_100K'	Passed
Running test TC01.14 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN_BAUD_50K'	Passed
Running test TC01.15 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN_BAUD_20K'	Passed
Running test TC01.16 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 == PCAN BAUD 10K'	Passed
	Passed

Running test TC01.18 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 = 0x0000' Running test TC01.19 - Initialize PCAN-USB interface with parameter 'Btr0Btr1 = 0xFFFF' Running test #TC01.20 - Initialize PCAN-USB interface with different baud rate than on real CAN Running test #TC01.21 - Initialize PCAN-USB interface after hot-plugging Running test #TC01.22 - Initialize PCAN-USB interface when interface is not connected to the bus anymore Running test #TC02.1 - Uninitialize PCAN-USB interface running with default parameters Running test TC02.1 - Uninitialize PCAN-USB interface when not initialized before Running test TC02.3 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test #TC02.7 - Uninitialize PCAN-USB interface with parameter 'Channel = PCAN_NONEBUS' after initializing Running test #TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running test #TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queue with an invalid value for parameter 'Channel' passed anymore Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running Suite TC04 - Get the current BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status while PCAN-USB interface is running with default parameters	in	unning test TC01.17 - Initialize PCAN-USB terface with parameter 'Btr0Btr1 == CAN_BAUD_5K'		
interface with parameter 'Btr0Btr1 == 0xFFFF' Running test #TC01.20 - Initialize PCAN-USB interface with different baud rate than on real CAN Running test #TC01.21 - Initialize PCAN-USB interface after hot-plugging Running test #TC01.22 - Initialize PCAN-USB interface when interface is not connected to the bus anymore Running test TC02.1 - Uninitialize PCAN-USB interface running with default parameters Running test TC02.2 - Uninitialize PCAN-USB interface when not initialized before Running test TC02.3 - Uninitialize PCAN-USB interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test #TC02.5 - Uninitialize PCAN-USB interface with parameter 'Channel == PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface with interface is not connected to the bus after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface with interface is not connected to the bus anymore Running test #TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queue with an invalid value for parameter 'Channel' passed		E	Passed	
interface with different baud rate than on real CAN Running test #TC01.21 - Initialize PCAN-USB interface after hot-plugging Running test #TC01.22 - Initialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC02 - Uninitialize a PCAN Channel Running test TC02.1 - Uninitialize PCAN-USB interface running with default parameters Running test TC02.2 - Uninitialize PCAN-USB interface when not initialized before Running test #TC02.3 - Uninitialize PCAN-USB interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test #TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel = PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running test #TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.5 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queue and check if the receive queue is empty Running test TC04 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04 - Get BUS status while PCAN-USB interface is running with default parameters			Passed	
interface after hot-plugging Running test #TC01.22 - Initialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC02 - Uninitialize a PCAN Channel Running test TC02.1 - Uninitialize PCAN-USB interface running with default parameters Running test TC02.2 - Uninitialize PCAN-USB interface when not initialized before Running test TC02.3 - Uninitialize PCAN-USB interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel == PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queue with an invalid value for parameter 'Channel' passed			Passed	
interface when interface is not connected to the bus anymore Running Suite TC02 - Uninitialize a PCAN Channel Running test TC02.1 - Uninitialize PCAN-USB interface running with default parameters Running test TC02.2 - Uninitialize PCAN-USB interface when not initialized before Running test TC02.3 - Uninitialize PCAN-USB interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel = PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test #TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status while PCAN-USB interface is running with default parameters		=	Passed	
Running test TC02.1 - Uninitialize PCAN-USB interface running with default parameters Running test TC02.2 - Uninitialize PCAN-USB interface when not initialized before Running test TC02.3 - Uninitialize PCAN-USB interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel == PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is not initialized before Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queue with an invalid value for parameter 'Channel' Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04 - Get the current BUS status Running test TC04.2 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters	in	terface when interface is not connected to the bus	Passed	
interface running with default parameters Running test TC02.2 - Uninitialize PCAN-USB interface when not initialized before Running test TC02.3 - Uninitialize PCAN-USB interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel = PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running test #TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues when PCAN-USB interface is running with default parameters Running test TC03.1 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.5 - Reset queues and check if the receive queue is empty Running test TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters	Running Suite TC	02 - Uninitialize a PCAN Channel		
interface when not initialized before Running test TC02.3 - Uninitialize PCAN-USB interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel == PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status while PCAN-USB interface is running with default parameters			Passed	
interface after reinitializing Running test #TC02.4 - Uninitialize PCAN-USB interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel == Passed PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters			Passed	
interface when interface is not present anymore Running test #TC02.5 - Uninitialize PCAN-USB interface when interface is used by another process Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel == Passed PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters			Passed	
Running test TC02.6 - Uninitialize PCAN-USB interface with parameter 'Channel = Passed PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test #TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-Passed		•	Passed	
interface with parameter 'Channel == Passed PCAN_NONEBUS' after initializing Running test TC02.7 - Uninitialize PCAN-USB interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-Passed			Passed	
interface with an invalid value for parameter 'Channel' Passed after initializing Running test #TC02.8 - Uninitialize PCAN-USB interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-Passed	in	terface with parameter 'Channel ==	Passed	
interface when interface is not connected to the bus anymore Running Suite TC03 - Reset the receive and transmit queues Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-Passed	in	terface with an invalid value for parameter 'Channel'	Passed	
Running test TC03.1 - Reset queues while PCAN-USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN-USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-Passed	in	terface when interface is not connected to the bus	Passed	
USB interface is running with default parameters Running test TC03.2 - Reset queues when PCAN- USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN- USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN- Passed	Running Suite TC	03 - Reset the receive and transmit queues		
USB interface is not initialized before Running test TC03.3 - Reset queue with an invalid value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-Passed			Passed	
value for parameter 'Channel' Running test TC03.5 - Reset queues and check if the receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN-USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN-Passed			Passed	
receive queue is empty Running Suite TC04 - Get the current BUS status Running test TC04.1 - Get BUS status while PCAN- USB interface is running with default parameters Running test TC04.2 - Get BUS status when PCAN- Passed Passed		= = = = = = = = = = = = = = = = = = = =	Passed
